How to Enable Pop-ups in IE

Solution:

1. Click the Tools button, and then click Pop-up Blocker.

Do one of the following:
   a. To turn off Pop-up Blocker, click Turn Off Pop-up Blocker.
   b. To turn on Pop-up Blocker, click Turn On Pop-up Blocker.

2. By default, Internet Explorer displays pop-ups that appear as a result of you clicking a link or button. Pop-up Blocker blocks pop-ups that are displayed automatically (without you clicking a link or button). If you want to allow a specific website to display automatic pop-ups, follow these steps:
   a. Click the Tools button, click Pop-up Blocker, and then click Pop-up Blocker Settings.
   b. In the Address of website to allow box, type the address (www.clarion.edu/myClairon) to allow pop-ups from this website, and then click Add.
   c. Click Close.
   d. Shut down all IE browser windows and then re-open.
