iView 3500STBII Cable TV Setup Instructions

1. Connect a coaxial cable from the “ANT IN” port on the back of the iView 3500STBII to the Cable TV port in your room.
2. Connect the desired output (HDMI, composite, component, or coaxial) to your television.
3. Select the correct input on your television.
4. Power on the iView 3500STBII using your remote controller. Note the remote controller is required to set up your iView 3500STBII.
5. Press Exit to access the main menu.
6. Press the right arrow until the Channel Search menu is displayed.
   a. Select Country.
   b. Change Signal Type from Air to Cable.
   c. Select Auto Search
7. The iView 3500STBII will now search for all available channels. This may take several minutes.
8. If desired, map your television’s power button using the instructions on the back of the remote.
