

## Instructional uses for ePortfolio

---

*ePortfolios are a tool and learning process for deepening student learning. Consider the following use cases:*

### Paper Submissions

---

One way to utilize ePortfolio in a course is to have students take papers from their assignments folder and share them in ePortfolio with a group. This group will be able to comment and give peer reviews to the shared document.

*Note: As the course instructor you must create a sharing group of entire class for students to share with as well as give permission to use turned in assignments and feedback in ePortfolio.*

### Upload Completed Projects

---

Students can upload and display completed projects, like videos, art pieces, or anything of that nature. They can then share their projects with students within their courses for peer review.

### Create a Collection for a Research Project

---

Students can upload and create a collection for a research project for easy access and organization of information for a research project.

## Subject Specific Examples

---

*There are many ways to integrate usage of ePortfolio within a course. A few subject specific examples are as follows.*

- **Marketing and Management** - Using ePortfolio in your marketing and management courses allows student to demonstrate the highlights of their academic career.
- **English/Language** - By using ePortfolio for a writing or language based course, professors can evaluate language proficiency, or provide a platform for peer review.
- **Art** - Students can upload completed projects and write reflections that focus on technical resolve concept/interest, composition and technique in order to create a presentation in ePortfolio.
- **Communication** - Students can upload complete projects, videos, or documentation to be shared with classmates for review or to be stored into a Professional portfolio to share with future employers.
