

## College Spotlight

### New Castle School of Trades

New Castle School of Trades (NCST) is multipurpose technical and trade institution located in New Castle, Pennsylvania. It offers certificate and associate degree programs designed to prepare students in the shortest amount of time using practical, hands-on experiences. Programs can last from six weeks to 60 weeks depending on the program. In 2016, NCST opened its branch campus in East Liverpool, Ohio. The school is accredited by the Accrediting Commission of Career Schools and Colleges. Weekend and evening classes are offered.

NCST offers programs in automotive technology, refrigeration and AC technology, machinist technology, heavy equipment operations w/commercial truck driving, electrical technology, diesel and power generation technology, diesel technology, diesel and heavy equipment repair technology, motorcycle and power equipment technology, commercial truck driving, industrial electro-mechanical technology, building technology, and combination welding. The most popular program at NCST is the 116.25 credit Associate in Specialized Technology in Electrical Technology, which takes 60 weeks to complete.

Tuition varies by program. The cost of attendance ranges from \$275 to \$25,000, with a median cost of \$15,000. There is no on campus housing. Eighty percent of students receive some kind of financial assistance.
